Brief Description	The crystal salt from Pakistan is one of the best-known and most popular natural salts worldwide. The natural salt owes its reddish colour to its iron oxide content. Mining takes place in large salt mines in the salt mountains, a low mountain range in the Pakistani province of Punjab, about 200 kilometers southwest of the actual Himalayas. The region is one of the largest rock salt deposits in the world. Legend has it that the huge salt dome was discovered by the horses in Alexander the Great's army. Crystal salt from Pakistan is considered a gift of nature and is an excellent table salt for daily use in the kitchen. The appealing appearance and the mild, unmistakable taste make this natural product so popular as table salt.
